

ELECTRICAL SUPERVISOR CERTIFICATE OF QUALIFICATION REQUIREMENTS

CITY OF KANSAS CITY, MISSOURI
CITY PLANNING AND DEVELOPMENT DEPARTMENT
DEVELOPMENT SERVICES
414 EAST 12th STREET, 5th FLOOR
KANSAS CITY, MISSOURI 64106
(816) 513-1500 X 3

A. LICENSE & CERTIFICATE OF QUALIFICATION DEFINED

A license is authority granted to the person, firm, partnership, company, corporation, association, agency, or other entity to whom it is issued to engage in the business of contracting to perform certain work. A license is not transferable (Section 18-326, Code of Ordinances).

A certificate of qualification is authority granted to an individual to perform certain skilled tradeswork and is not transferable (Section 18-336, Code of Ordinances).

A contractor license is required for an individual or business to perform regulated work and is distinct from the supervisor's certificate of qualification. As such, a contractor license must be applied for and procured separately from the supervisor's certificate.

B. LICENSE & CERTIFICATE CLASSIFICATION

A licensed electrical contractor class III shall be authorized to do the following:

Installation, alteration, repair, or removal of communication; fire alarm; burglar alarm; remote control; and other low-energy power, low-voltage power, signal, sound recording, and similar equipment regulated by the building code.

All work shall be performed by or under the supervision of the holder of an electrical supervisor certificate of qualification or a master electrician certificate of qualification.

C. REQUIREMENTS FOR THE CERTIFICATE

A certificate application must include a completed application form, the required reference letters described below, a \$55.00 nonrefundable application fee, and either proof of passage of an acceptable substitute exam or a request for an exam registration form for an examination to be given for the City of Kansas City, Missouri, by Prometric or the International Code Council (ICC). Checks are to be made payable to City Treasurer/City Planning And Development Department Development Services and are to be submitted, along with the application and required supporting documentation, to the address shown above.

The applicant must meet these requirements:

- (1) The applicant shall provide at least two notarized reference letters completed and signed by official representatives of at least two companies engaged in the electrical trade and verifying that the applicant has at least three years of experience in the electrical construction field at the journeyman, foreman, supervisor, or contractor level. One of the required three years' experience must be in the commercial or industrial field. The reference letters (provided by City Planning and Development Department Development Services as part of the standard information packet) must be filled out in their entirety, and all critical areas of experience must be verified therein.

NOTE: References shall come only from the applicant's past or present supervisors or employers in the electrical trade (i.e., bona fide managerial staff, company owners, corporate officers, partners, or principals). References shall **not** be accepted from these sources: material suppliers, the applicant's own past or present employees, individuals who have served under the applicant's direction, inspections staff from any jurisdiction, insurance representatives, bank representatives, or other sources not having direct personal knowledge and oversight of the applicant's tradeswork. One of the applicant's required reference letters may come from a relative, but only where that party is the individual's employer or direct supervisor and is actually a bona fide practitioner of the trade in which the applicant is seeking certification.

EXCEPTION: As an alternative to providing the required reference letters, the applicant may submit verifiable proof of certification in the same classification from another jurisdiction where the requirements are the same as or better than the City of Kansas City, Missouri. Such certification shall be verified with the jurisdiction issuing that certification; shall be current at the time of application with the City of Kansas

City, Missouri; and shall be shown by that jurisdiction to have been issued based on equivalent or higher standards to those in place for that same classification in Kansas City, Missouri.

- (2) An individual having less than three years of full-time experience in the electrical trade shall not be considered to have met this requirement.
- (3) The applicant shall be at least 21 years of age.
- (4) The applicant shall be a senior high school graduate or shall have passed the General Educational Development Test. One additional year of experience may be substituted for each year of high school accreditation lacking.
- (5) The applicant shall earn a score of 70% or higher on one of the two recognized exams administered for Kansas City, Missouri: the low voltage electrical (21414) examination administered by Prometric or the low-voltage electrician examination administered by ICC.

EXCEPTION: The Kansas City, Missouri, examination may be waived if the applicant has earned a passing score of 70% or higher on a Prometric or ICC examination or other department-approved national testing agency examination **comparable in content** to the examination currently given for the City of Kansas City, Missouri. **The applicant must provide verifiable documentation of the examination, which is acceptable to the director of City Planning And Development Department Development Services.** Please note that, if 70% is not considered a passing score on the particular version of the exam the applicant has taken, it shall not be considered a passing score for the purposes of certification by the City of Kansas City, Missouri.

D. APPLICATION REVIEW

The application will be reviewed for compliance with the work experience, education, and age requirements outlined on the preceding page; and applicants will be notified of any deficiencies. **All references may be contacted by City Planning And Development Department Development Services for verification of work experience; and all certification requirements must be deemed satisfied before a certificate can be issued.**

E. EXAMINATION SCHEDULING

When the application has been accepted by City Planning And Development Department Development Services, the applicant will be mailed an examination registration form for the testing agency whose exam he/she has selected. The information booklets included in the original mailing contain information concerning examination fees, content, format, references, dates, locations, deadlines, etc. Additional copies can be obtained online from Prometric at www.prometric.com/default.htm and from ICC at www.iccsafe.org. It is up to the applicant to decide which testing agency's qualifying exam to take; however, only one test can be taken per one-month period, regardless of which agency and test site are used. The testing agency shall send the applicant a confirmation letter concerning the date, time, location, and type of examination for which he/she has been scheduled.

Please note that both agencies operate on a first-come, first-served basis and are limited as to the number of examinees they can accommodate at their sites on any given day. Furthermore, the registration form and payment must reach the testing agency no later than the published application deadline to be considered for a given test date. Therefore, it is to the applicant's advantage to turn in his/her examination registration form and proper payment to the selected testing agency as early as possible. Examination fees are neither refundable nor transferable.

F. EXAM SCORE REPORTING

The testing agency shall mail the applicant written confirmation of his/her score and pass/fail status. The score is not valid until such time as the City of Kansas City, Missouri, receives official confirmation from the testing agency. Applicants electing to take the ICC examination shall be responsible for advising the City of their status after they have passed it so the City can seek confirmation from ICC, update their files, and make a determination.

Please note that the examination must be taken and passed and the passing score reported to the City of Kansas City, Missouri, by the testing agency within one year of the application processing date; otherwise, the application becomes null and void, and the individual must reapply for further consideration.

Please also note that an individual may attain a passing exam score and still be denied certification for failure to meet the other minimum qualifications.
